

Vitaly Nikolaevich Kurnosenko

Foreign Trade Data Analyst / Export Analytics / China Market Research

Moscow, Russia | remote | open to business travel

Male, 50 years old, date of birth: 03.03.1976

Phone: +7 (916) 726-00-09 | Email: kurnosenko@mail.ru | Telegram: @vitaly_kur

Citizenship: Russia | Work authorization: Russia, China

Languages: Russian - native; English - B2; Chinese - B1

Target Position

- Foreign Trade Analyst / Foreign Trade Data Analyst / China-focused Export Analytics
 - Work format: full-time, remote
 - Expected compensation: negotiable, aligned with the target market range for the role
-

Profile

Analyst with 16+ years of experience at the intersection of foreign trade, logistics, business analysis, and data work. Strong at combining market and cross-border trade expertise with practical analytics: structuring large datasets, comparing product categories and suppliers, evaluating logistics feasibility and unit economics, and preparing business recommendations for launching new directions.

Have hands-on experience analyzing production bases in China and Russia, assessing logistics schemes, working with China trade statistics, and reviewing foreign trade operations. Complement domain expertise with SQL, Python, Power BI, Jupyter, PostgreSQL, MS SQL, BigQuery, and DBT, which helps quickly assemble analytical tables, reports, dashboards, and scoring models for decision-making.

Strong fit for roles that require validating export hypotheses by category, analyzing trade statistics, matching regulatory barriers with manufacturing capabilities and logistics, and translating findings into clear long-list / short-list recommendations for business stakeholders.

Core Competencies

Area	Experience and tools
Foreign trade and export analytics	Analysis of foreign trade activity, export potential evaluation by category, market and product comparison, business recommendations for launch decisions.
China and regulation	Practical China experience, understanding of import restrictions, certification logic, documentation requirements, and go-to-market constraints for cross-border supply.
Production base analysis	Analysis of industry-specific manufacturing bases in China and Russia, supplier search and evaluation, assessment of scale, capacity, supply stability, and project risks.

Trade statistics	Work with China trade statistics and industry datasets, comparing volumes, dynamics, seasonality, price levels, and market size to validate category hypotheses.
Logistics and economics	Assessment of logistics volumes and routes, multimodal scheme selection, profitability calculation, project-level management accounting, and financial attractiveness analysis.
Data analytics	SQL, Python, Power BI, Jupyter Notebook, PostgreSQL, MS SQL, BigQuery, DBT, DWH/ETL, analytical reporting, data visualization, and automation of calculations and data marts.
Models and reporting	Building analytical tables, comparison matrices, dashboards, evaluation criteria, and scoring approaches for short-list / long-list decisions.
Communication	Gathering and structuring requirements, aligning business and development teams, and preparing clear conclusions for stakeholders without overloading them with technical detail.

Professional Experience

Business Analyst (China) - Sinoptics

March 2025 - Present

- Led a cross-functional product team working on automation of financial document parsing, verification, and adjacent business scenarios.
- Gathered, structured, and aligned requirements between business and engineering, including acceptance criteria and validation rules.
- Formalized document review workflows and process checkpoints, improving transparency of statuses and analytics quality for stakeholders.
- Coordinated pilots and product workstreams, preparing clear reporting on implementation progress and risks.

Business Analyst / Data Engineer - Yofi (fintech / AI)

February 2022 - March 2025

- Designed DWH and ETL/ELT processes using DBT, PostgreSQL, MS SQL, MongoDB, DynamoDB, Redis, Neo4j, and GraphQL.
- Built a project ROI calculation system and dashboards for analytical reporting.
- Used SQL, Python, JavaScript, Airflow, Spark, PySpark, and Airbyte to process large data volumes and build analytical pipelines.
- Automated API documentation and advised teams on data use in operational and analytical scenarios.

Data Analyst (Logistics / Foreign Trade) - Forms LLC

January 2017 - March 2022

- Analyzed manufacturing bases in China and Russia to identify promising categories and suppliers.
- Worked with China statistics and combined market and foreign trade data to evaluate business directions.
- Assessed logistics volumes, routes, and constraints; selected and planned optimal multimodal transportation schemes.
- Monitored profitability, management accounting by project, and financial attractiveness of product

categories.

- Analyzed foreign trade activity and coordinated financial interaction between companies within cross-border projects.
- Prepared analytical materials to support decisions on categories, routes, and supply configurations.

Key Account Manager / Foreign Trade Projects - Engineering Solutions LLC

February 2013 - January 2017

- Analyzed the foreign trade market, competitive landscape, and risks across product directions.
- Supported foreign trade projects and coordinated communication with counterparties.
- Evaluated logistics schemes including road, rail, and multimodal transportation.
- Prepared conclusions for commercial decisions with respect to timelines, risks, and economic feasibility.

Product Analyst - New Technologies LLC

January 2010 - February 2013

- Analyzed markets and segments, reviewed competition, built business plans, and identified company growth directions.
 - Developed and optimized product assortment and managed production in China: factory selection, negotiations, contracting, manufacturing, and logistics coordination.
 - Managed logistics and foreign trade operations and contributed to product launch and go-to-market activities.
 - Achievement: launched an exclusive line of lighting equipment, secured entry into major retail chains, and reached profitability earlier than planned.
-

Education

- MBA, RANEPA, CIO track, 2007
 - Candidate of Physical and Mathematical Sciences, Southern Federal University, 2003
 - Specialist degree in Radiophysics, Southern Federal University, 1999
-

Additional Education

- Chief Accountant course, Znanie, 2003
 - Effective Negotiations certificate, 2015
-

Skills

- SQL, Python, Power BI, Jupyter Notebook, MS SQL Server, PostgreSQL, BigQuery, DBT
 - Data analysis, analytical reporting, visualization, automation of calculations
 - Business analysis, requirements analysis, KPI, financial metrics, management accounting
 - Foreign trade, logistics, multimodal transportation, China market analysis, work with manufacturing bases
-

Additional Information

- Driving license category B
- Strengths: systems thinking, critical analysis, strong work ethic, result orientation
- Ready to quickly dive into paid databases and internal company sources to build regular export analytics

focused on China
