Professional summary

Finance executive and senior financial operations professional with 15+ years of hands-on experience in budgeting, treasury planning, cash-flow control, management reporting, financial governance, and cross-border operations in China and international business environments. Strong background in plan-vs-actual analysis, monthly payment planning, banking operations, internal controls, contract and procurement procedures, compliance with legal documentation, internal procedures and HQ requirements, and IFRS/CAS financial reporting support.

Currently combining roles in corporate finance leadership and economics/finance management in Shanghai, including company launch, finance process setup from scratch, QAD reporting configuration, board materials, auditor coordination, and support for Russian and Chinese shareholders. Well suited for a Financial Analyst role requiring precision, speed, structured reporting, liquidity support, operational coordination, and compliance with internal procedures and legal documentation.

Bring a practical mix of finance, analytics, systems thinking, and cross-functional coordination. Strong user of Excel, with working knowledge of SQL and Python for structured analysis, reporting support, reconciliation logic, and handling large volumes of operational and financial data. Comfortable handling large information flows, supporting fast operational decisions, and working with management, banks, auditors, counterparties, and HQ-style stakeholders in a demanding international environment.

Core competencies

Area	Evidence
Financial reporting	Budget preparation, limits, monthly and quarterly reporting, annual and quarterly plan-vs-actual analysis, management reporting, report setup in QAD
Treasury & liquidity support	Cash-flow forecasting under multiple scenarios, monthly payment plans, payment execution, bank operations, loan drawdown and repayment support
Controls & compliance	Financial control of payment documents, internal financial procedures, procurement and contract policies, pricing and budgeting procedures

IFRS / CAS	Participation in annual and quarterly unconsolidated and consolidated reporting, audit support, reporting mapping, communication with external auditors
Banking & counterparties	Account administration, online banking, banking documentation, relations with banks, clients, counterparties, and corporate stakeholders
Systems & analytics	Advanced Excel, ERP/QAD reporting, MS SQL, basic-to-intermediate SQL/Python for financial analysis support, structured financial analysis, data-driven decision support, process automation mindset
Cross-border operations	China-based finance leadership, coordination with Russian and Chinese founders, board interaction, international trade and operating environment

Professional experience

Deputy Head of Economics and Finance Department — CRAIC (Shanghai, China)

December 2017 — Present

- Supported the economics and finance function of a China-based business with focus on budgeting, reporting, cash-flow planning, and financial discipline.
- Prepared budget packages, spending limits, and quarterly/yearly plan-vs-actual analysis.
- Produced cash-flow projections under different business scenarios and monthly payment planning.
- Participated in quarterly and annual IFRS/CAS reporting, including both unconsolidated and consolidated formats.
- Worked with auditors on financial statement review and reporting requirements.
- Configured and generated financial reports in QAD, improving reporting structure and management visibility.
- Supported capitalization projects, board materials, and financing-related documentation.
- Managed banking workflows, account operations, supporting documents, and internal payment controls.
- Ensured that finance and operating activities were performed in line with legal documentation, internal procedures, and HQ requirements, supporting disciplined and compliant execution.

CFO — Shanghai Nine-Two-Nine Aircraft Design Limited Company (Shanghai, China)

November 2021 — 2025

- Launched and organized financial and operational activities from scratch for a new company supporting an international team of 10 people in China.
- Developed, coordinated, and implemented policies and procedures for procurement, contract approval, pricing, budgeting, and financial control.
- Prepared budgets, limits, quarterly and annual plan-vs-actual analysis, and management materials for decision-making.
- Built cash-flow scenarios, monthly payment plans, and actual payment tracking to support liquidity visibility and day-to-day operations.
- Participated in annual and quarterly unconsolidated and consolidated financial reporting under IFRS and CAS.
- Managed auditor selection, contracting, and audit interaction related to financial statements.
- Prepared capitalization roadmaps, feasibility materials, and board papers on charter capital, including audit of contributed capital and subsidiary capitalization.
- Maintained relationships with banks, clients, counterparties, founders, and the board of directors.

- Oversaw financial control of payment documents, payment execution, banking operations, and compliance with internal finance procedures.

Executive Director — Engineering Solutions (China / Russia)

2013 — 2017

- Managed Chinese and Russian teams across procurement, sales, and foreign trade operations.
- Oversaw sales planning, commercial execution, and contract negotiations with B2B clients.
- Participated in financial planning, pricing, profitability management, and operating control in an international trading environment.
- Coordinated customer-facing commercial activity, international exhibitions, supplier engagement, and production organization.

Executive Director — New Technologies (Moscow, Russia)

2008 — 2013

- Launched and managed sales, procurement, and operating activities with responsibility for business profitability and expansion.
- Controlled pricing, profitability, purchasing, production planning, and retail/account relationships.
- Managed operational and financial activities in cross-border sourcing across Southeast Asia.
- Supported new market entry, licensing activity, and business development execution.

Earlier commercial and management roles

2003 — 2008

- Built practical experience in management accounting, financial control, and implementation of financial, production, and management information systems.
- Worked on logistics and foreign trade operations, including import/export supply chains, customs duty calculation, Incoterms, pricing, cost calculation, and international contracts.

Education

- MBA, Russian Presidential Academy of National Economy and Public Administration (RANEPA), 2005-2007
- Candidate of Physical and Mathematical Sciences, Southern Federal University, 2000-2003
- Degree in Physics, Southern Federal University, 1994-1999
- College of Radio Electronic Instrument Engineering, 1991-1995

Certifications

- CAP — Certified Accountant Practitioner
- CPA Russia professional development courses: IFRS financial accounting and reporting, management accounting, taxation of the Russian Federation, legislation of the Russian Federation
- Chief Accountant qualification courses

Fit for the target role

- Strong match for P&L / management reporting, risk-aware financial control, liquidity planning, operational support, and cross-functional coordination
- Deep experience in regulated finance processes, legal-document-driven operations, and stakeholder

interaction across countries and management levels

- Strong Excel / ERP / financial reporting background with additional SQL, Python, and finance systems implementation capability
- Direct trading-floor execution in securities and derivatives is not the core of prior roles; however, the background is highly relevant for trading support, operations, reporting, controls, treasury, and finance analyst responsibilities
